

Practical Week -2

Task-1

Develop a C program that uses the system calls `open()`, `read()`, `write()`, and `close()` to copy the contents of one file to 3 another. Explain how control transitions between user Space and kernel space during execution.

```
satwika@SATWIKA: ~/task2.c

GNU nano 8.7.1 task2.c *
#include <stdio.h>
#include <fcntl.h>
#include <unistd.h>

int main() {
    int fd1, fd2;
    char buffer[100];
    int n;

    fd1 = open("File1.txt", O_RDONLY);

    if (fd1 < 0) {
        printf("Error opening File1.txt\n");
        return 1;
    }

    fd2 = open("File2.txt", O_CREAT | O_WRONLY | O_TRUNC, 0644);

    if (fd2 < 0) {
        printf("Error opening File2.txt\n");
        close(fd1);
        return 1;
    }

    n = read(fd1, buffer, sizeof(buffer));

    if (n < 0) {
        printf("Error reading file\n");
        close(fd1);
        close(fd2);
        return 1;
    }

    ^G Help          ^O Write Out      ^F Where Is
    ^K Cut           ^T Execute        ^X Exit
    ^R Read File     ^\ Replace        ^U Paste
    ^J Justify
```

```
satwika@SATWIKA: ~/task2.c

GNU nano 8.7.1 task2.c *
    if (n < 0) {
        printf("Error reading file\n");
        close(fd1);
        close(fd2);
        return 1;
    }

    write(fd2, buffer, n);

    close(fd1);
    close(fd2);

    printf("File copied successfully.\n");

    return 0;
}

^G Help          ^O Write Out      ^F Where Is
^K Cut           ^T Execute        ^X Exit
^R Read File     ^\ Replace        ^U Paste
^J Justify
```

```
satwika@SATWIKA: ~

satwika@SATWIKA:~$ echo "Hello, this is File1.">File1.txt
satwika@SATWIKA:~$ cat File1.txt
Hello, this is File1.
satwika@SATWIKA:~$ nano task2.c
satwika@SATWIKA:~$ gcc task2.c -o task2
satwika@SATWIKA:~$ ./task2
File copied successfully.
satwika@SATWIKA:~$ cat File2.txt
Hello, this is File1.
satwika@SATWIKA:~$ ls -l File.txt File2.txt
ls: cannot access 'File.txt': No such file or directory
File2.txt
satwika@SATWIKA:~$ ls -l File1.txt File2.txt
-rw-r--r-- 1 satwika satwika 22 Aug 16 11:27 File1.txt
-rw-r--r-- 1 satwika satwika 22 Aug 16 11:33 File2.txt
```

Task-2

Use the strace utility to trace all system calls generated by the command `cat sample.txt`. Analyze the sequence of system 3 calls and identify the kernel services involved.

satwika@SATWIK: ~

```
satwika@SATWIKA:~$ echo "Hello Operating System">sample.txt
satwika@SATWIKA:~$ cat sample.txt
Hello Operating System
satwika@SATWIKA:~$ strace -e trace=execve,openat,read,write,close,exit_group cat sample.txt
